DRESSED IN DENIM

Fashion and design merge with fresh perspective in Poltrona Frau's Archibald chair, now in a new denim edition. Designed by Jean-Marie Massaud for Italian furniture brand Poltrona Frau, it was introduced in 2009 and has since become an iconic piece in contemporary furniture design. The denim version brings a slightly more hip, urban vibe to the piece, its pleats and elegant proportions now dressed in a deep indigo fabric featuring a slub warp that gives it a distinctive three-dimensional appearance visually and tactilely.
