## The weight of light

A borosilicate glass vase, a Lycra cover, and three translucent spheres of different diameters and weights: simply placing one on the elastic fabric turns on the lamp by **Martinelli Luce**, where the sphere becomes both a decorative element and a diffuser. Depending on the weight, the intensity and tone of the dynamic LED light change: from soft and warm to stronger and cooler.

## News flies

**Poltrona Frau** and Fornasetti renew their collaboration with a reinterpretation of the 1919 armchair and Isidoro bar cabinet, upholstered in Pelle Frau® ColorSphere® Impact Less featuring the "Ultime notizie" motif, created by Piero Fornasetti in 1950. The print showcases colorful butterflies fluttering over newspaper clippings, a playful trompe-l'œil reflecting Fornasetti's visual poetry.
